3 Dataset authors

Joe Young (Owner) and Adamyoung (Editor)

4 Context

Predict next-day rain by training classification models on the target variable RainTomorrow. It means – did it rain the next day, Yes or No? This column is Yes if the rain for that day was 1mm or more.

5 Content

This dataset contains about 10 years of daily weather observations from many locations across Australia.

6 Coverage

Temporal coverage start date: 10/31/2007

Temporal coverage end date: 06/24/2017

Geospatial coverage: Australia

7 Some latest weather
